Overview

SFU SDK is a client development kit for Flashphoner's Selective Forwarding Unit (SFU) with Simulcast feature. Use it to develop complex video rooms and conferences.

SFU SDK works with WCS builds since 5.2.1056.

Resources

Version	Download	NPM	Browser	API docs
1.0	Release notes	@flashphoner/sfusdk	sfu.js	1.0
2.0	Release notes	@flashphoner/sfusdk	sfu.js	2.0

Browser demo examples are described in this section

Differences between versions

Version 1.0 (not supported) is written in JavaScript and may be used in browser only. Version 2.0 is written in TypeScript and may be used in Node.js projects, in Electron for example
