Removing

To remove WCS from server, to reinstall completely or to move to another server for example, do the following:

1. Go to folder /usr/local/FlashphonerWebCallServer/bin

```
cd /usr/local/FlashphonerWebCallServer/bin
```

2. Stop WCS with command

```
sudo ./webcallserver stop
```

3. Check if any WCS process still running

```
ps aux | grep FlashphonerWebCallServer-
```

and stop them all if found

```
kill PID
```

Where PID is WCS process pid

4. Uninstall WCS with command

```
sudo ./uninstall.sh
```

5. Go to home folder

```
cd ~
```

6. Remove WCS folders if exist. Folders can be listed with command

```
ls /usr/local | grep FlashphonerWebCallServer-
```

Then WCS can be installed from scratch to the server again as described here.
