

Streams monitoring with web interface

- [Current streams](#)
 - [Overview](#)
 - [Transcoders](#)
 - [Details](#)
- [Stream history](#)
 - [Overview](#)
 - [Details](#)

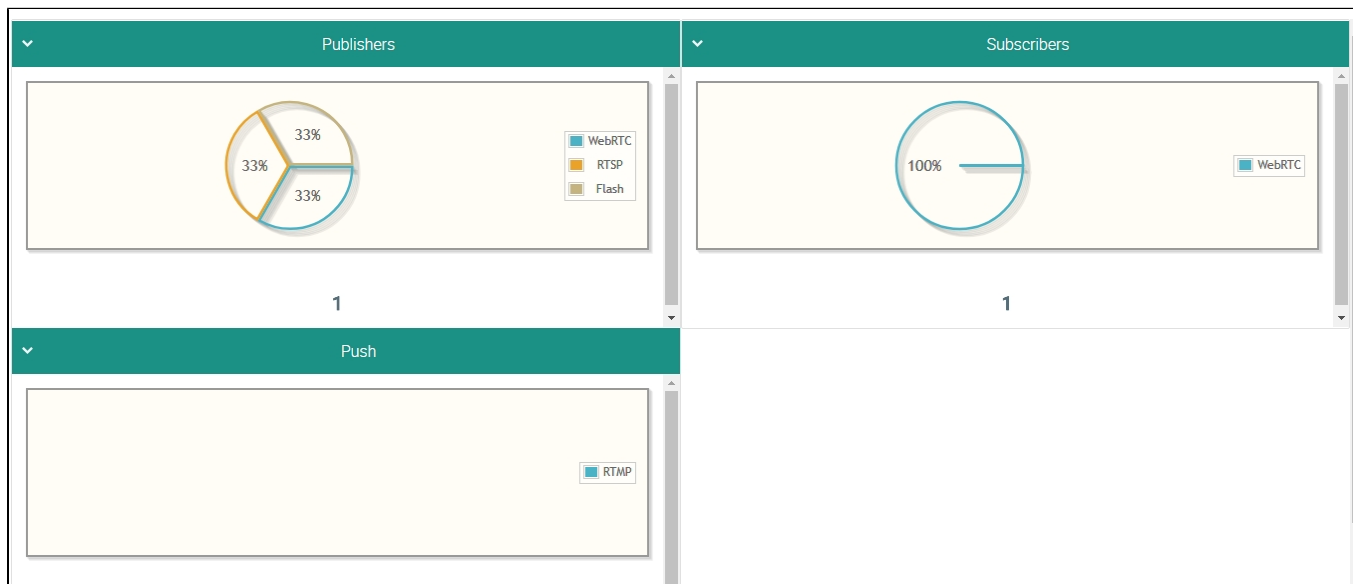

To monitor media streams you should select "Streaming" in the monitoring menu, then select "Real-Time" to view information about current streams or "History" to view history of streams.

Current streams

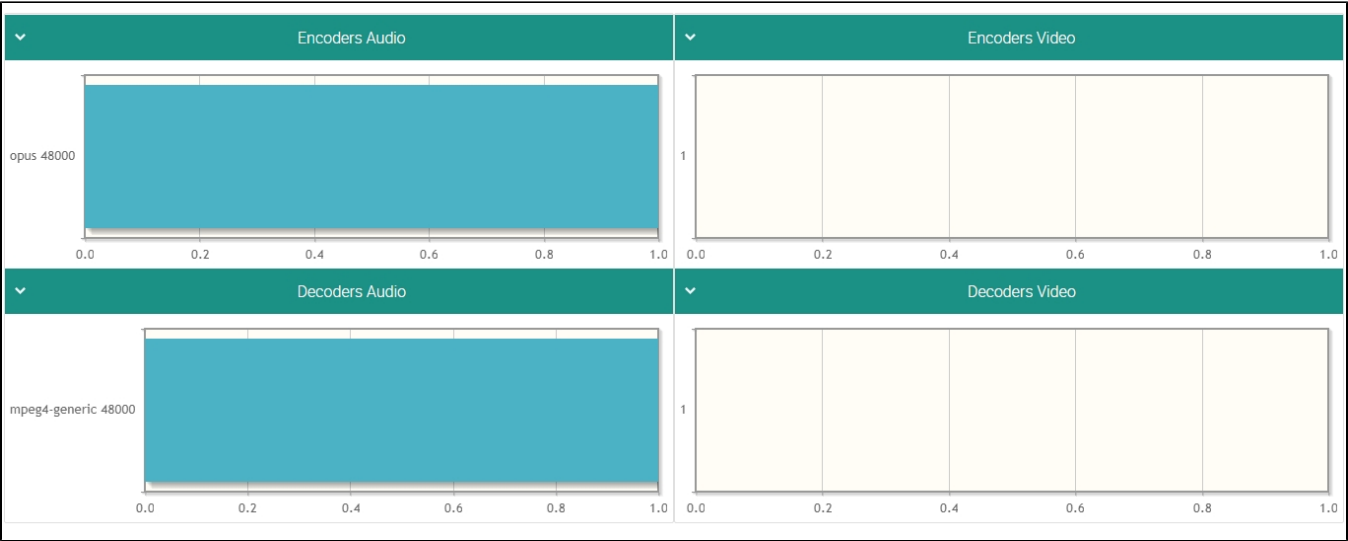

Overview

In the "Overview" section you can find summary of technologies among published streams (Publishers), subscribers (Subscribers) and rebroadcast streams (Push)

Transcoders

In the "Transcoders" section you can find summary of encoders and decoders of audio- and video streams.

Details

The "Details" section displays a list of streams being published or rebroadcast by WCS at this moment

The table shows the following stream parameters:

- Media session identifier
- Stream name
- Stream publishing/subscribe technology
- Stream type: published, subscribed
- Beginning of broadcast
- End of broadcast
- Session identifier
- Parent media session identifier
- Status
- Reason for publishing/subscribe termination

- Is the stream recorded

The list of stream history can be filtered:

- by the specified period;
- by stream type;
- by status
- by availability of the record

You can view details about the stream by clicking it in the table
