

How to get license number

The current (activated) license number is available by two ways:

1. Log in to WCS web interface by URL `https://yourhost:8444/admin`, where yourhost is WCS server name. Click "License" button

The screenshot shows the WCS web interface. The top navigation bar includes links for Demo, Security, and License. The License section displays the version v.0.5.28.2753-5.2.5- and the license number 95e09f12e566bce582b232b0297d4b8d74482c9c. The main content area is titled "Web Call Server 5 License" and states "The license is activated". Below this, the license number CC110AC1- is shown, followed by a redacted area. There are also fields for Subscription License and Expires, with a redacted area for the expiration date. A "Deactivate" link is present.

You can select and copy license number from page.

2. In SSH client (Putty for example) enter the following commands

```
cd /usr/local/FlashphonerWebCallServer/bin
./activate.sh
```

The activation script will display current license number and will offer to deactivate it. Enter "no"

The screenshot shows a terminal window with the following text:

```
-----
Flashphoner License Activation
-----

Do you agree deactivate current license (CC110AC1- ) ?
[yes/no]
no
You need deactivate current license
```

You can select and copy license number from terminal window.
