Publishing bitrate constraints support

Since Android SDK 1.1 build 1.1.0.37 it is possible to set minimum and maximum publishing bitrate constrains using the methods `setMinBitrate` and `setMaxBitrate` of `VideoConstraints` class. The bitrate constraints values are set in kbps.

Example code

```
private void setVideoBitrate(VideoConstraints videoConstraints) {
    if (mPublishVideoMinBitrate.getText().length() > 0) {

videoConstraints.setMinBitrate(Integer.parseInt(mPublishVideoMinBitrate.getText(

    }
    if (mPublishVideoMaxBitrate.getText().length() > 0) {

videoConstraints.setMaxBitrate(Integer.parseInt(mPublishVideoMaxBitrate.getText(

    }
}
```
