Republishing to Youtube

Preparing to the test

For the test we use:

- the demo server at demo.flashphoner.com;
- the Two Way Streaming web app to publish streams;
- the Chrome browser and the REST-client to send REST queries.

2. Create a live stream on Youtube

Create a live stream on Youtube (we assume you have activated the corresponding section in your Youtube account and successfully verified and approved the account). Copy the URL of the server and the stream key from the Encoder setup section:

BASIC INFO	STREAM OPTIONS	CARDS	
Test			
Live stream test			
Schedule next	stream		2
Howto & Style		-	
Privacy			
Unlisted		•	
			Advanced settings
ENCODER SETUP			
Server URL			
rtmp://a.rtmp.yo	outube.com/live2		
Stream name/key			
		Reveal	

3. WCS configuration

Add the following parameters to flashphoner.properties file:

```
rtmp_transponder_stream_name_prefix=
rtmp_flash_ver_subscriber=LNX 76.219.189.0
rtmp_transponder_send_metadata=true
```

Restart WCS.

4. Create a broadcast from a web camera to the WCS server

Open the Two Way Streaming web application. Click the **Connect** button, then specify the stream key from Youtube under the **Local** window, then click **Publish**:

Two-way Streaming					
Local	Player				
C Manyo	am.com				
r2xs-4dvh-d9ct-72ec	Stop	1ab2	Play	Available	
PUBLISHING					
wss://test1.flashphoner.com:8443			Disconnect		
ESTABLISHED					

5. Republish the stream using REST API

Open the REST client. Send the /push/startup query to the WCS server and specify the stream key in the streamName parameter and the Youtube server URL in rtmpUrl:

Method Request URL POST • http://test1.flashphoner.com:9	1091/rest-api/push/startup	∽ SEND :
Parameters 🔨		
Headers	Body	Variables
Body content type Editor view application/json - Raw input	·	
<pre>{ "streamName": "r2xs-4dvh-d9ct-72ec", "rtmpUrl": "rtmp://a.rtmp.youtube.com }</pre>	/live2"	
200 OK 160.80 ms		DETAILS 🗸

6. Checking if Youtube receives the stream

On the broadcast settings page click Advanced. On the advanced settings page, in the right corner click View on Watch page button:

Info and Settings	Cards	Ive Dashboard	View	on Watch Page	4
Test			Cancel	Save change	19

The watch page opens:

	PouTube RU	Search	Q
	-	ManyCam.com	
	and the second
